UVOD:

Korišćeni programski jezici:

Jezici koji su se koristili za izradu ovog sajta su: HTML, BOOTSTRAP,CSS,JavaScript,XML i JQUERY.

Opis funkcionalnosti:

Sajt poseduje više dinamičkih i programiranih funkcionalnosti koje su raspoređene na nekoliko stranica. Na svim stranicama nalazi se dinamički meni koji se generiše pomoću JavaScript-a, čime je obezbeđena jednostavnija navigacija i lakše održavanje sajta.

Na stranici sa knjigama realizovano je dinamičko učitavanje podataka iz JSON fajla, prikaz proizvoda u obliku kartica, filtriranje po različitim kriterijumima, sortiranje proizvoda, kao i prikaz detaljnih informacija o svakoj knjizi.

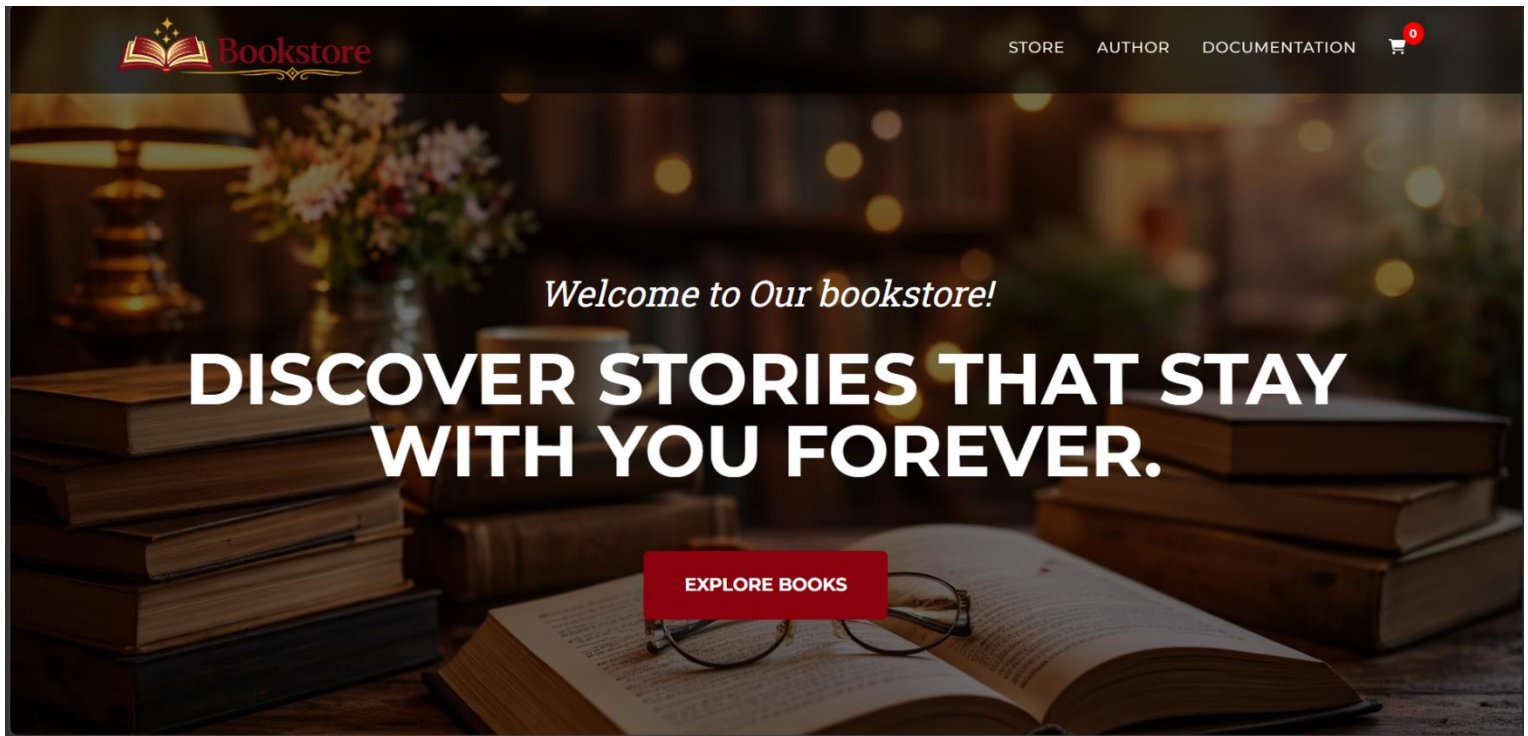

Na početnoj stranici nalaze se programski efekti i dinamički blokovi sadržaja, poput sekcije sa recenzijama korisnika koje se takođe ispisuju iz JavaScript objekata.

Na stranici korpe omogućeno je dinamičko dodavanje i uklanjanje proizvoda, promena količine pomoću plus i minus dugmadi, automatski obračun ukupne cene pojedinačnih proizvoda i cele korpe, kao i pražnjenje korpe.

Pored toga, na sajtu su realizovana i vizuelna obaveštenja kroz toast poruke, kao i ažuriranje bedža sa brojem proizvoda u korpi, što dodatno doprinosi interaktivnosti i boljem korisničkom iskustvu.

Na stranici za završetak kupovine (contact.html) realizovana je forma koja omogućava korisniku unos ličnih i kontakt podataka potrebnih za porudžbinu.

Forma sadrži više različitih elemenata (input polja, email, telefon, select lista, textarea), pri čemu se ispravnost unosa proverava pomoću regularnih izraza (validacija imena i prezimena, email adrese, broja telefona i adrese). Nakon uspešnog unosa i klika na dugme za potvrdu kupovine, izvršava se programska obrada podataka – brišu se svi proizvodi iz korpe i prikazuje se vizuelno obaveštenje (toast poruka) o uspešno završenoj kupovini. Ova funkcionalnost obezbeđuje kontrolu unosa podataka, poboljšava korisničko iskustvo i simulira realan proces online kupovine.

Template:

U ovom podglavlju prikazan je template stranice koji predstavlja osnovnu strukturu sajta i koristi se na svim stranicama aplikacije. Template se sastoji iz tri glavna dela: zaglavlja (header), centralnog dela za prikaz sadržaja (section) i podnožja (footer). Zaglavlje sadrži navigacioni meni koji se dinamički generiše pomoću JavaScript-a, što omogućava da isti meni bude prikazan na svim stranicama sajta bez potrebe za njegovim ponovnim pisanjem. Podnožje (footer) je takođe zajednički deo svih stranica i sadrži osnovne informacije, linkove i kontakt podatke.

Centralni deo stranice je promenljiv i razlikuje se u zavisnosti od stranice, pri čemu se sadržaj dinamički učitava i ispisuje pomoću JavaScript-a. Na taj način je omogućena ponovna upotreba template-a i bolja organizacija koda. Na slici je prikazana struktura div elemenata koji čine raspored stranice, dok je u nastavku dat listing HTML koda koji definiše ovaj template. Ovakav pristup omogućava lakše održavanje sajta i dosledan izgled svih stranica.

WHY CHOOSE OUR BOOKSTORE

Everything you need for a simple and enjoyable book shopping experience.

Wide Book Collection

Explore books from different genres, authors and publishers, all in one place.

Best deals and offers

Find books at discounted prices and enjoy special offers on selected titles.

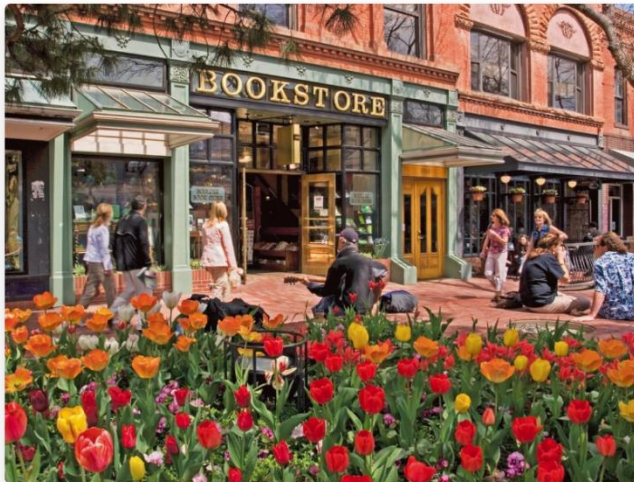

Easy Online Shopping

Quickly add books to your cart and enjoy a smooth and secure shopping experience.

ABOUT OUR BOOKSTORE

Discover stories, knowledge and inspiration

Since 1905

Desire Meets A New Taste

A small river named Duden flows by their place and supplies it with the necessary regalia. It is a paradisiacal country, in which roasted parts of sentences fly into your mouth.

On her way she met a copy. The copy warned the Little Blind Text, that where it came from it would have been rewritten a thousand times and everything that was left from its origin would be the word "and" and the Little Blind Text should turn around and return to its own, safe country.

121 Years of Experience

CUSTOMER REVIEWS

What our readers say about us

★★★★★

"Amazing bookstore with a wide selection of titles. The website is easy to use and I quickly found the books I wanted."

Emma Johnson

Book lover

★★★★☆

"Great prices and a very clean design. I especially liked the discount offers and how simple the shopping process was."

Daniel Carter

Regular customer

★★★★★

"A beautiful online bookstore experience. The categories are clear, the books are well presented, and everything feels professional."

Sophia Miller

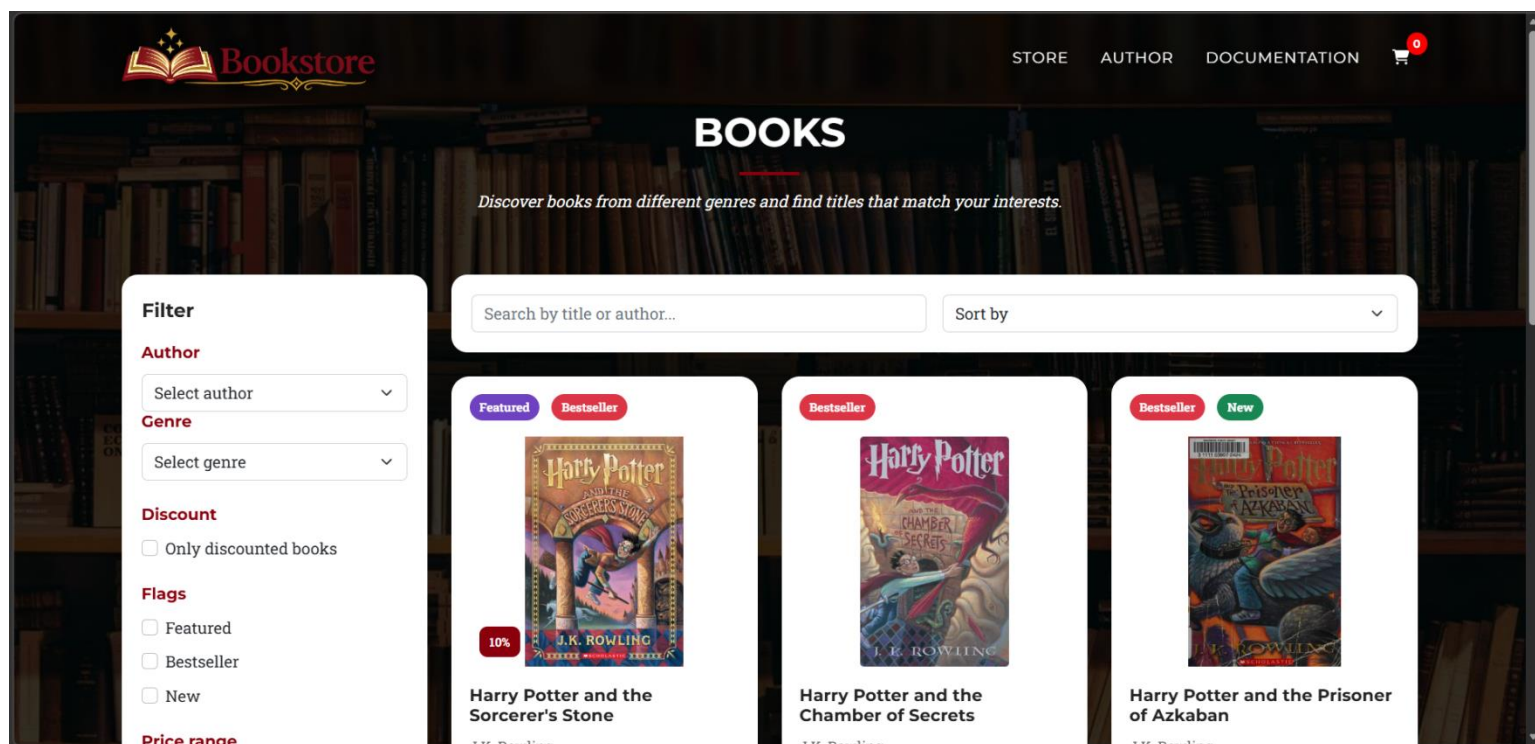

Student

Stranica **index.html** predstavlja početnu stranicu sajta i korisniku pruža uvod u sadržaj i osnovne funkcionalnosti online knjižare. Na vrhu stranice nalazi se navigacioni meni koji je zajednički za sve stranice i omogućava jednostavno kretanje kroz sajt, uključujući direktan pristup prodavnici, stranici autora, dokumentaciji, kao i korpi putem ikonice. Centralni deo stranice sadrži vizuelno atraktivan uvodni blok (hero sekciju) sa pozdravnom porukom i istaknutim sloganom, kao i dugmetom „Explore Books“ koje vodi na stranicu sa knjigama.

Ispod uvodnog dela nalaze se sekcije koje dodatno predstavljaju funkcionalnosti sajta, poput prikaza prednosti kupovine (npr. širok izbor knjiga, povoljne cene i jednostavna kupovina), zatim „About“ sekcija sa informacijama o knjižari i njenoj tradiciji, kao i sekcija sa recenzijama korisnika koja se dinamički generiše pomoću JavaScript-a. Na dnu stranice nalazi se footer sa osnovnim informacijama, društvenim mrežama i kontakt podacima.

Dizajn stranice i raspored elemenata delimično su preuzeti iz Bootstrap template-a, dok je dinamičko učitavanje sadržaja (navigacija, recenzije i pojedine sekcije) realizovano samostalno pomoću JavaScript-a.

Stranica **books.html** omogućava korisnicima pregled i pretragu dostupnih knjiga. Na vrhu stranice nalazi se naslov i kratki opis, dok je centralni deo organizovan u dve celine. Sa leve strane nalazi se filter panel koji omogućava filtriranje knjiga po autoru, žanru, popustu, oznakama (featured, bestseller, new) i cenovnom opsegu. U gornjem delu nalazi se i polje za pretragu po nazivu ili autoru, kao i opcija za sortiranje rezultata. Knjige su prikazane u obliku kartica koje sadrže sliku, naziv, autora, cenu, ocenu i dugmad za detalje i dodavanje u korpu. Podaci se dinamički učitavaju iz JSON fajla pomoću JavaScript-a, dok je dizajn kartica delimično preuzet iz Bootstrap template-a.

U donjem delu stranice nalazi se paginacija koja omogućava prikaz knjiga po stranicama, čime se poboljšava preglednost većeg broja proizvoda. Takođe, korisnik može primeniti odabrane filtere klikom na dugme „Apply Filters“, dok opcija „Reset Filters“ vraća početno stanje prikaza. Promena filtera, sortiranja i pretrage vrši se dinamički bez ponovnog učitavanja stranice. Ukupna funkcionalnost filtriranja, sortiranja i paginacije realizovana je samostalno pomoću JavaScript-a.

Klikom na dugme „View details“ otvara se modalni prozor koji prikazuje detaljne informacije o izabranoj knjizi. U okviru modala nalaze se slika knjige, naziv, opis, žanr, jezik, broj strana, godina izdavanja, ocena, status dostupnosti i cena. Takođe, korisniku je omogućeno direktno dodavanje proizvoda u korpu iz modala. Modal je implementiran korišćenjem Bootstrap komponente, dok se podaci dinamički ubacuju pomoću JavaScript-a.

3. Cart.html

Stranica **cart.html** omogućava korisniku pregled svih proizvoda koje je dodao u korpu. U centralnom delu stranice prikazuju se izabrani proizvodi u obliku liste, gde svaki proizvod sadrži sliku, naziv, cenu, količinu i ukupnu cenu za taj proizvod. Korisniku je omogućeno da menja količinu proizvoda pomoću dugmadi za povećanje i smanjenje, pri čemu se vrednosti automatski ažuriraju. Takođe, postoji opcija za uklanjanje pojedinačnih proizvoda iz korpe.

Sa leve strane nalazi se sekcija „Cart Summary“ koja prikazuje ukupan broj proizvoda i ukupnu cenu cele korpe. U okviru ove sekcije korisnik može nastaviti proces kupovine klikom na dugme „Checkout“ ili

obrisati sve proizvode iz korpe pomoću dugmeta „Clear Cart“. Sve promene u korpi (dodavanje, brisanje, promena količine) izvršavaju se dinamički pomoću JavaScript-a, bez potrebe za ponovnim učitavanjem stranice.

U slučaju da korpa ne sadrži nijedan proizvod, prikazuje se posebna poruka kojom se korisnik obaveštava da je korpa prazna, kao i dugme „Continue Shopping“ koje vodi nazad na stranicu sa knjigama. Ova funkcionalnost omogućava jasno korisničko iskustvo i jednostavno upravljanje sadržajem korpe.

Please choose a city.

Payment Method

The image displays two screenshots of a web application's checkout process. The background is a dark-themed bookshelf.

Top Screenshot: The checkout form is shown with several validation errors in red text. The 'Address' field has the error 'Enter a valid address.' The 'City' dropdown menu has the error 'Please choose a city.' The 'Payment Method' section has the error 'Please choose a payment method.' The 'Additional Note' field is empty. At the bottom, there is a checkbox for 'I agree with the terms and conditions' with the error 'You must accept the terms and conditions.' A red 'Finish Purchase' button is visible.

Bottom Screenshot: The same checkout form is shown, but with a green success message at the top right: 'Your order has been successfully completed!'. The validation errors are no longer present. The 'Finish Purchase' button remains at the bottom.

Form Fields and Elements:

- Address:** Text input field with placeholder 'Street and number'.
- City:** Dropdown menu with placeholder 'Choose city'.
- Payment Method:** Radio buttons for 'Cash on Delivery' and 'Card'.
- Additional Note:** Text area with placeholder 'Optional note'.
- Terms and Conditions:** Checkbox for 'I agree with the terms and conditions'.
- Finish Purchase:** Red button.

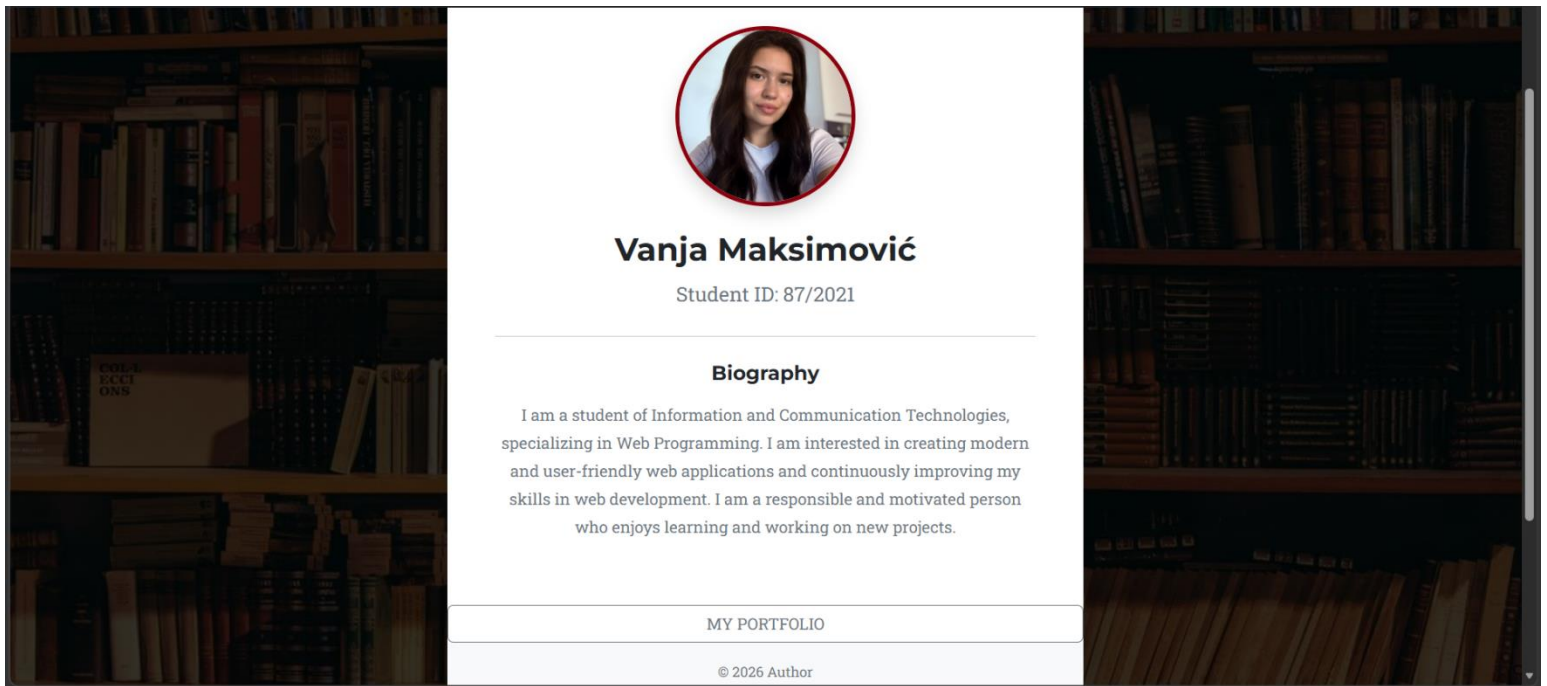

Stranica **contact.html** predstavlja završni korak u procesu kupovine i do nje se dolazi klikom na dugme „Checkout“ na stranici korpe (**cart.html**). Na ovoj stranici korisnik unosi svoje podatke neophodne za realizaciju porudžbine putem forme.

Forma sadrži više različitih elemenata, uključujući unos imena i prezimena, email adrese, broja telefona, adrese stanovanja, izbor grada iz padajuće liste, način plaćanja (gotovina ili kartica), kao i dodatnu napomenu. Takođe, korisnik mora potvrditi prihvatanje uslova korišćenja označavanjem odgovarajućeg polja.

Za svako polje u formi implementirana je validacija pomoću regularnih izraza, čime se proverava ispravnost unetih podataka (npr. format email adrese, broj telefona i ime). U slučaju neispravnog unosa, korisniku se prikazuju odgovarajuće poruke o grešci.

Nakon uspešnog popunjavanja forme i klika na dugme „Finish Purchase“, izvršava se obrada podataka – korpa se prazni i korisniku se prikazuje vizuelno obaveštenje (toast poruka) o uspešno završenoj kupovini. Ova funkcionalnost je реализована pomoću JavaScript-a i simulira realan proces online kupovine.

5. Author.html

Stranica **author.html** predstavlja statičku stranicu namenjenu predstavljanju autora sajta. Na ovoj stranici prikazane su osnovne informacije o autoru, uključujući fotografiju, ime i prezime, broj indeksa, kao i kratku biografiju. Biografija sadrži osnovne podatke o obrazovanju, interesovanjima i ciljevima u oblasti web programiranja.

Stranica je organizovana u jednostavnom i preglednom formatu, sa jasno istaknutim informacijama, kako bi korisnik mogao brzo da se upozna sa autorom sajta. Dizajn stranice je delimično preuzet iz Bootstrap template-a, dok je sadržaj u potpunosti samostalno kreiran.
